***Interview Summary***

References discussed: Wang 899 and Del Pico 566.

An agreement was reached on the 112 rejection. The rejection will be withdrawn based on the language of "substantially free of macrovoids" based on the disclosure of macrovoids in page 8 of the specification and figures 1-3.

An agreement was reached on the Del Pico ref. The rejection over Del Pico reference will be withdrawn based on the declaration and the fact that Del Pico reference is silent on the macrovoids.

Applicants argued that the Wang reference was not enabling because cellulosic materials would form macrovoids when made according to the teachings of Wang, as evidenced by the declaration. Examiner said this will require further consideration, and no agreement was reached.
